

# AgriBoost™

**AgriBoost is a feed for soil microbes, resulting in increase in numbers, and impacts their activity. It should be used in conjunction with a well-balanced nutrient program. AgriBoost is the thick, sugar rich juice created by the processing of either sugar beets, or sugar cane plants. It is a good, quick source of energy for the various forms of microbes and soil life. Because of the high energy sugar content, conversion of nutrients from unavailable form into an available form by organisms feeding on AgriBoost in the root zone, increased root mass is observed. Microbes will feed on AgriBoost and mobilize and mineralize soil nutrients for the total soil factory.**

# AgriBoost™

## BENEFITS OF AGRIBOOST:

- Filtered via patented 175 mesh filtration process, AgriBoost is the best carbohydrate to use and will not plug nozzles.
- Provides “food” source for ABM products which increases the efficacy.
- Fits into a systematic approach to agronomy and increases soil/plant biology interactions. Yield increases are expected with the addition of Biofuel to ABM products.
- Food source for naturally occurring soil biology
- Mixes well with most in-furrow and foliar products causing no issues with application equipment.
- Increased nutrient efficiency on all crops.
- AgriBoost is a biological feed to improve: mineralization, yield potential and microbial diversity.

## SUGGESTIONS FOR USE

AgriBoost is excellent when applied to soil in conjunction with biological products or organic nutrients or sprayed directly on foliage or injected/watered into the soil root zone. The normal rate depends on the crop, season and application method.

## GUARANTEED ANALYSIS:

Soluble Potash (K<sub>2</sub>O) .....3.0%  
Derived from: Standardized Molasses Total Sugar as Invert 43%
