Planter Box Formulation **PB**

Micro Encapsulated Inoculant

Excalibur Gold PB™ is recommended for seed treatment application. It contains naturally occurring Trichoderma soil fungi that has been encapsulated in this formulation to enhance plant growth, increase fertilizer absorption and water uptake efficiency. The beneficial Trichoderma fungi colonizes the plant root zone and provides continuous efficacy with a single application at the beginning of the planting season.

DIRECTIONS FOR USE:

Seed Application: Excalibur Gold PB™ is recommended to be applied to 45 kilograms of seed. Mix seed and Excalibur Gold PB™ together until the seed is covered throughout. Once the seed is covered plant immediately.

For root dip or drench application: Prepare slurry by transferring one pouch and 3 liters of **NON-CHLORINATED** water into a plastic or metal container that has sufficient size to fit its volume. Mix solution thoroughly until Excalibur Gold PB™ is mixed within the water evenly. Place the root system of the transplanted crop into the slurry mix for 10 seconds or until the root system is sufficiently covered. Once the root system is covered plant treated crop immediately.

APPLICATION RATE:

1 Full packet of Excalibur Gold PB™ is to be mixed with 45 kilograms seed.

COMPATIBILITY:

Excalibur Gold PB™ is compatible with many common fungicides and insecticides. For current compatibilities, contact your ABM representative or call 011-419-232-2461. This product is non-toxic to humans.

WARRANTY:

Advanced Biological Marketing guarantees the culture in this package will inoculate the quantity and kind of seed specified on this pouch when: (1)Product is used prior to expiration date (2)Product is stored properly (3)Product is used under favorable soil and weather conditions (4)Product is used in accordance with directions for use noted on this package. All field performance complaints must be brought to the attention of Advanced Biological Marketing within seventy (70) days of planting.
