

AgriBoost™

GUARANTEED ANALYSIS:

Soluble Potash (K₂O)3.0%

Derived from: Standardized Molasses Total Sugar as Invert 43%

GENERAL USAGE INSTRUCTIONS:

AgriBoost is designed to be used in conjunction with a balanced fertility program. Suggested application rate is 3 - 8 fluid ounces per acre in-furrow. Consult with your Advanced Biological Marketing representative for specific application rates based on row spacing.

AgriBoost may be applied via fertigation : Suggested application rate 1 - 4 gallons per acre per fertigation.

AgriBoost may be applied via spray application. An application rate of 4 oz. to 32 oz. an acre ; do not exceed 1% v/v of spray solution; excellent as a foliar sticker. Rate will vary based on crop, timing and mix tank. Consult with your Advanced Biological Marketing representative for specific application rates based on crop, timing and tank mix.

For information regarding specific application rates, application methods, and mixing and handling instructions, consult with your Advanced Biological Marketing representative for specific information.

Always follow an agronomically balanced fertility and plant nutrient program.

MIXING PRECAUTIONS:

Always do a jar-test to determine compatibility with any other liquid fertilizer. This product is water miscible, allowing it to be applied through properly designed liquid application equipment. If diluted with water, use within 72 hours of mixing. For injection into irrigation waters (Pivot, Emitter or T-Tape) be sure sufficient water for distribution is used to ensure coverage.

STORAGE INSTRUCTIONS:

Store AgriBoost above 40 °F. Do not allow AgriBoost to freeze.

Net Contents: 2.5 gal. (320 fl. oz.) (9.64 l.)

Net Weight: 29.5 pounds
