

# America's Best Inoculant<sup>®</sup> ABI 120

## Soybean Inoculant System

**ABI 120 Soybean Inoculant System** is an all liquid bundle containing a high concentrate of America's Best Liquid Inoculant<sup>®</sup> plus Liquid Extender / Polymer. It is triple stacked with two *B. japonicum* and one *B. elkanii*. The *elkanii* provides more N fixation and early nodulation.

- **Aggressive nodulation by the Bradyrhizobia including *B. elkanii***
- **Patented Bradyrhizobia strains**
- **Ultra low application rate with improved treatability**
- **Up to 120 day planting window after application to seed**
- **Offers more ROI than competitive products**
- **3 strains of Bradyrhizobia - one being *Elkanii***

# America's Best Inoculant<sup>®</sup> ABI 120

## Soybean Inoculant System

**Make ABI 120 a part of your seed treatment program. It outperforms the competition in head to head trials.** ABI 120 Soybean Inoculant System is an all liquid bundle containing a high concentrate of America's Best Inoculant<sup>®</sup> and liquid extender/polymer. It drastically reduces seed bridging and sticking, especially when applied with seed fungicides or insecticides. ABI 120 Soybean Inoculant System contains a triple stack Rhizobia package including Bradyrhizobia Elkanii for top yield responses. This strain package was developed by the best minds in Rhizobium genetics and is backed by research and scientifically proven test plot results. And it's patented and available only from Agrauxine.

### **Low Application Rate**

ABI 120 for Soybeans has one of the lowest application rates available to keep treated soybean seed flowing. Only 0.725 fl. oz per 140k unit of soybean seed.
