Excellorate™

2-2-1

Excellorate is for use on a wide range of plants including row crops, cereals and specialty crops. It can be applied as a seed treatment, in-furrow or foliar application.

Storage and Disposal:

Store in a cool, dry area out of reach of children. Keep in original container. Keep container tightly sealed when not in use. Do not allow to freeze.

Compatibility:

Do a compatibility check to insure proper mixing. Excellorate is a stable product with excellent tank mixing characteristics. It can be applied in conjunction with most herbicides, insecticides, fungicides and foliar fertilizers. A jar test is recommended prior to tank mixing.

Directions for Use:

SHAKE WELL BEFORE USE

Foliar Application: Product may be foliar applied at most stages of plant growth at the rate of 8 fl/oz to 16 fl/oz ounces per acre. For best results spray when the crop is in an active growing state after irrigation or natural rainfall. Spray early in the morning or late in the afternoon for best leaf absorption. Use adequate water to wet foliage, typically 5-10 gallons of water per acre of application. (Foliar application is intended as a supplement to a regular fertilization program and will not, by itself, provide the nutrients normally required by agricultural crops.) Use in accordance with the recommendations

of a qualified individual or institution or according to an approved nutrient management plan.

In-furrow Treatment:

For all crops the recommended rate is to apply at least 4 fl oz and up to 6 fl oz per acre (typically 5-10 gallons of water per acre of in-furrow application).

Seed Treatment:

Crop	Application Rate
Corn: Field, Sweet and Pop	.5oz per 80,000 Kernels
Soybeans	.5oz per 140,000 Seeds
Cereals: Wheat, Sorghum, Oats, Spelt, Barley, Rye and Triticale	.5oz per 100# of seed
Cotton	.5oz per 230,000 seeds

Guaranteed Analysis:

Total Nitrogen (N).....2.0%
Available Phosphate (P₂O₅).....2.0%
Soluble Potash (K₂O).....1.0%
Boron (B).....0.05%
Cobalt (Co).....0.002%
Copper (Cu).....0.14%

and Copper Sulfate, Sodium Borate, Sodium Molybdate, Cobalt Sulfate.

Limited Warranty:

Agrauxine by Lesaffre guarantees that this product meets the specifications set forth on this label when: Product is stored properly and product is used in accordance with directions for use noted on this package and other technical recommendations referenced on this label. All field performance complaints must be brought to the attention of Agrauxine by Lesaffre within seventy (70) days of planting or application.

Agrauxine by Lesaffre makes no other express or implied warranty of fitness, warranty of merchantability, or warranty of a particular purpose, or any other expressed or implied warranty. Agrauxine by Lesaffre's liability is hereby expressly limited to the purchase price of this package only. In no event shall Agrauxine by Lesaffre of any seller of this product be liable for consequential, special or indirect damages resulting from the use or handling of this product.

WARNING: Contains Boron. Do not use on Boron sensitive crops. Use only according to manufacturer's directions. Recommended for use on row crops including corn, soybeans and cereal crops grown for grain and forage. Do not use on peas or pulse crops.

CAUTION: The application of fertilizing materials containing Molybdenum (Mo) may result in forage crops containing levels of Molybdenum (Mo) which are toxic to ruminant animals.
