

# MAXIMUM YIELD ADVANTAGE. INNOVATIVE PLANTER PROTECTION.

A unique soybean inoculant with a proprietary blend of **THREE** strains of yield enhancing Rhizobia bacteria with an innovative talc-graphite carrier for increased seed flowability with high adhesion and low use rates.

- Fast and convenient application
- Proven yield benefits
- Patented talc/graphite carrier
- Grower applied

Application rate of 0.5 oz. per 140k unit of seed.

## RHIZOLOCK:

- NEW patented Rhizobia encapsulation technology!
- Less dust off
- Improved product deposition
- Improved Rhizobia survivability in adverse conditions
- Yield is enhanced over past current formulation up to 5%
- Better seed coverage
