

Romeo

ROMEIO FOR FRUITING VEGETABLES (tomato, pepper, eggplant)

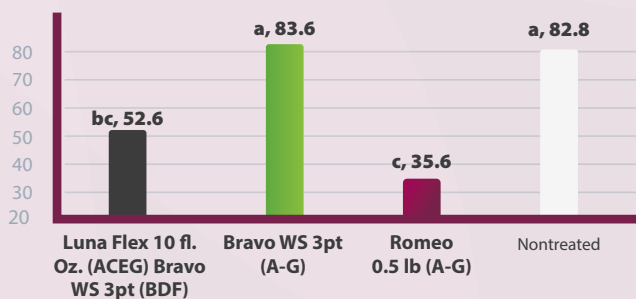

Romeo Natural Plant Stimulator

Romeo is a biological fungicide containing the active ingredient Cerevisane®, the cell wall of the yeast *Saccharomyces cerevisiae* strain LAS117. Cerevisane induces natural plant defense mechanisms for control of early blight (*Alternaria* spp), powdery mildew, Anthracnose, target spot, Botrytis, Rhizoctonia

Romeo Benefits:

- Broad-spectrum disease control utilizing a novel mode-of-action
- Cost-effective, proven performance - apply 0.45 - 0.68 lb/acre alone or in a tank mixture
- 4-hr REI and 0-day PHI
- Powerful disease control and an excellent partner to reduce the development of synthetic fungicide resistance
- Easy to mix and spray. Compatible with tank mixture partners
- Conventional and organic production, OMRI certified
- Marketing flexibility - exempt from residue tolerances, no MRL (maximum residue limit) issues
- Positive Return-on-Investment - disease control, improved yield & quality

Early Blight Severity %

- Romeo provided great early blight control
- Significantly better than Luna Flex alternating Bravo Weather Stik and Bravo Weather Stik, alone

2024 trial, FL. Tomato variety 'Charger' transplanted 27-Apr. 7-weekly fungicide applications (A-G) 24-May to 03-Jul. Romeo and Luna Flex applications mixed with Induce at 0.25% v/v
