

CONDITIONER

**ONLY FOR USE AS AN
ADJUVANT WITH VERONE.**

This product is a conditioner designed to improve the miscibility of Verone with water. Keep container tightly closed in order to prevent contamination. Use within 8 hours of opening if stored at room temperature or warmer. Use within 1 week if refrigerated after opening.

DIRECTIONS FOR USE:

MIXING INSTRUCTIONS: Best results are achieved when bucket slurring: adding Verone, then adding Conditioner, then mixing before addition to the application slurry tank. Equal parts of Verone & Conditioner are always used. If in-line screens or filtration is used, DO NOT USE screens smaller than 50 mesh. DO NOT mix with chlorinated water.

1. Calculate batch quantities for all mix components based on Directions for Use of Verone.
2. Prepare a mix container that is separate from the slurry container or treatment tank.
3. Measure and add Verone to this separate mix container. Measure Verone by volume.
4. Measure and add an equal amount of Conditioner to this separate mix container. Measure Conditioner by volume.
5. Mix or stir the Verone and Conditioner until both are combined. Once combined, additional diluents may be added to container for ease of pouring.
6. Agitate and add Verone and Conditioner blend to the seed treater tank, slurry tank, or treatment tank. Maintain agitation as long as the Verone and Conditioner is in the tank. Agitation is needed in order to maintain suspension.

Tank Mix Time Restrictions: To maintain maximum viability, there is a maximum time Verone and Conditioner can be kept in the mix tank:

1. Verone and Conditioner alone with non-chlorinated water should be applied within 24 hours; longer may result in loss of viability. Active tank-mixes shall be applied within 4 hours. If this time is exceeded, discard or add more Verone.

USE RATES: Add Conditioner in equal parts at a 1:1 volumetric ratio to Verone. Refer to Verone label Directions for Use for proper application rate based on crop group and amount of seed treated.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage, disposal or cleaning of equipment.

PRODUCT STORAGE: Store in original container only and keep tightly sealed. Avoid exposure to light. Store in closed storage areas between 40°F – 77°F. Use within 8 hours after opening if stored at room temperature or above. If refrigerated after opening, use within 1 week.

PRODUCT DISPOSAL: Dispose of contents in accordance with all government regulations.
